

WHAT IS CLAIMED IS:

1. A pharmaceutical preparation comprising a lectin which is free from peroral toxicity, and a protein recoverable from blood bound to said lectin in administration-stable manner.
2. A pharmaceutical preparation as set forth in claim 1, wherein said protein recoverable from blood is selected from the group comprising blood coagulation factors and recombinant equivalents thereof.
3. A pharmaceutical preparation as set forth in claim 1, wherein said lectin is a plant lectin.
4. A pharmaceutical preparation as set forth in claim 1, wherein said lectin is WGA.
5. A pharmaceutical preparation as set forth in claim 1, wherein said administration-stable bond between said lectin and said protein is an acid-labile, covalent bond.
6. A pharmaceutical preparation as set forth in claim 1, wherein said administration-stable bond between said lectin and said protein is cleaved by a protease specific for target compartments.

7. A pharmaceutical preparation as set forth in claim 1, wherein said lectin is a modified lectin.
8. A pharmaceutical preparation as set forth in claim 1, wherein said lectin is a lectin modified at its target compartment to a drug.
9. A pharmaceutical preparation as set forth in claim 1, wherein said lectin is a lectin modified at its binding site to target compartments.
10. A pharmaceutical preparation as set forth in claim 1, said preparation being confectioned for peroral administration.
11. A pharmaceutical preparation as set forth in claim 10, further comprising a gastric-juice-resistant coating.
12. A pharmaceutical preparation as set forth in claim 1, wherein said lectin is WGA and said protein is bound to said WGA via an acid-labile cis-aconityl-bond.
13. A pharmaceutical preparation as set forth in claim 1, said preparation being provided as a prodrug formulation.
